

Startup Venture Agreement

He has subjected whatever is in Heaven and whatever is on Earth to you; it all comes from Him.

Qur'an 45:13

Enabling Investment Group (EIG) invests in people and the startup ventures they own and operate that show promise in being able to provide products and services in a variety of industries. An important part of how EIG invests in people is to establish a network of support staff who help people build the skills and capabilities needed by many of the startup ventures.

These capabilities extend beyond helping them prepare business plans and include helping them in thinking through and making operational and management decisions.

Persons who want to receive investment funds and other forms of investor support from EIG for their startup ventures agree to the following requirements.

Must prepare and submit a business plan to be considered for possible funding.

Must present their business plan to the investment group when asked.

Must agree to work with investors and support staff to try to make their funded venture successful.

Must agree to attend workshops designed to help them develop the skills needed to sustain their funded venture or to better position their startup venture for future funding.

Must agree to consider the option to support a funded startup venture with capital and/or labor if their venture is not funded.
